Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2878

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "emitter" of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. Claims 1-4 and 6-23 are objected to because of the following informalities:

In claim 1, line 6, "couple" should be changed to --coupled--.

In claim 2, lines 2-3, "essentially comprised" should be changed to --comprised--.

In claim 2, line 16, "one an" should be changed to --one--.

Regarding claims 9, 14, 18-23, these claims contain more than one period (.) therein.

Appropriate correction is required.

Regarding claims 2-4 and 6-23, these claims are objected to because they include reference characters which are not enclosed within parentheses. Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Art Unit: 2878

3. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-26 are prolix since the metes and bounds of the claimed subject matter cannot be determined due to the excessive use of alternatives therein. See MPEP 2173.05(m).

In addition, regarding claim 1, applicant recites in lines 17-18 the limitation "gate and emitter of one or more than one high resistance transistors". No one transistor may have such elements. As "gate" refers to an electrode of a field effect transistor and "emitter" refers to an electrode of a bi-polar transistor, the terms "gate" and "emitter" cannot be used to refer to any "one" transistor. Regarding claim 18, claim 18 is indefinite due to the use of the term "i.e."

Claims not specifically mentioned above are rejected by virtue of their dependency on a rejected claim.

4. No patentability based on art will be determined at this time since the intended scope of claims is unclear.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lennington et al, Jones and Arakawa are cited for disclosing a circuit comprising a high input resistance transistor.
